Selariu Alexandru

Phone: 0724770142 Mail: Selariu.Alexandru.mail@gmail.com

I am a Front-End Developer with extensive experience working on over 10 professional projects within the React ecosystem across diverse industries including banking, retail, insurance, and life sciences. My roles have ranged from maintaining design system libraries to developing web applications from scratch for various clients. I have also led front-end teams on projects, where I was responsible for setting up the application, creating reusable components, implementing UI testing, and upholding clean code practices.

Skills

HTML 5	React.js	Cypress	StoryBook
CSS 3	Redux	Node	Accessibility
JavaScript	TypeScript	Vitest	React Testing Library

Experience

Cognizant Softvision (Aug 2022 – Present)

- Developed an app using gen AI that helped the client to generate drafts that took 6-8 weeks, to be performed in less than one hour.
- Implemented a chat application in the life sciences sector, enabling users to efficiently query and retrieve information from uploaded documents and various publications.
- Developed and optimized workflows for onboarding new clients to one of the world's largest banks.
- Integrated and configured testing libraries, state management solutions, routing systems, and UI frameworks to streamline development processes and enhance application performance.

Endava (Apr 2020 – Aug 2022)

- Worked on 7 different projects within the React ecosystem.
- Fixed accessibility on 4 different insurance sites to reach level AA compliance.
- Implemented the internationalization of the page.
- Contributed to a design system library using React.
- And a different design system library using web components.
- Tested applications with different testing frameworks for unit tests and end to end test.

Education

West University of Timisoara / Faculty of Economics and Business Administration

Licentiate degree: Management

Master's degree: Human Resources Management
